Re: WT Docket No. 11-18; WT Docket No. 06-150; WT Docket No. 11-186; RM-11592; RM-11497

Dear Ms. Dortch:

On November 21, 2011, Steven K. Berry, President and CEO of RCA; Tim Donovan, VP of Legislative Affairs of RCA; and I met with Amy Levine, Senior Counsel and Legal Advisor to Chairman Julius Genachowski. The parties discussed the urgent need for interoperability in the 700 MHz band as a means to ensure competition in the wireless industry.¹ This *ex parte* notification is being filed electronically with your office pursuant to Section 1.1206 of the Commission's Rules.

RCA urged the FCC to restore interoperability across the 700 MHz band and most immediately in the lower portion of the band. As supported by the economic study, "Non-Interoperability at 700 MHz: Lower Revenues & Higher Prices," the lack of interoperability in the 700 MHz band continues to harm consumers, industry, and the economy as a whole. Specifically, the economic study concludes that the continuation of non-interoperability will result in a number of negative outcomes regarding revenues and federal budget contributions from future spectrum auctions; the potential to fulfill the goal of ubiquitous mobile broadband; and competition, innovation, and pricing in the wireless market. The Commission should consider all avenues to immediately correct the harms caused by a lack of interoperability.

Sincerely,

/s/

Rebecca M. Thompson
General Counsel

cc: Amy Levine
